## EDUCATION

### McMaster University

Graduation: May 2027

Bachelor of Engineering, Computer Engineering (CO-OP) - GPA: 3.5

Hamilton, Ontario

**Leadership:** Manager of the McMaster Engineering Society

**Relevant Courses:** Data Structures and Algorithms, Machine Learning, Operating Systems, Software Development, Principles of Programming, Algorithm Design and Analysis, Computer Systems Integration Project, Statistics.

## EXPERIENCE

### Software Developer Intern

May 2026 – August 2026

Criteo

Toronto, Ontario

- Owned the end-to-end design, implementation, and rollout of an architectural migration for the Retail Media UI using **Angular** and **TypeScript**, replacing a multi-hop call with direct integrations resulting in **20%** faster performance.
- Developed robust **C#** RESTful APIs and optimized service-layer logic, delivering the primary project OKR ahead of schedule and seamlessly processing **1,000+** direct API calls in the first week with zero downtime.
- Proactively designed the new **API** by implementing an extension for category filtering, validated changes through comprehensive NUnit testing, demonstrating flexible architectural design while adhering to key platform timelines.

### Software Developer Intern

May 2025 – May 2026

SOTI

Mississauga, Ontario

- Architected scalable RESTful APIs within a **microservices** architecture using **C#** and **SQL**, streamlining data processing and optimizing retrieval efficiency for over **1000** daily requests.
- Engineered reusable **Angular** and **TypeScript** components and interfaces to drive the launch of **3** new features, following the full **SDLC** and leveraging **Git** and **CI/CD** pipelines to automate deployments and improve reliability.
- Partnered cross-functionally with UX designers, QA, and product managers in an **Agile** environment, translating complex requirements into robust technical solutions to deliver over **\$10,000** in custom mobile applications.

### Service Design Intern

May 2024 – August 2024

Ontario Public Service

Toronto, ON

- Developed and presented a proof-of-concept Land Index System to upper management using **Java**, **Angular**, **SQL**, and **Git**, which streamlined the retrieval and organization of provincial land data for over **500** users.

### Web Team Manager

June 2024 – Present

McMaster Engineering Society | [Source Code](#) | [Website](#)

Hamilton, ON

- Leading a team of developers creating a Clubs and Teams Portal for **1,000+** engineering students using **TypeScript** and MongoDB. Reviewing code and developing backend REST APIs in a team-driven, agile work environment.

## PROJECTS

### Software Defined Radio on Raspberry Pi | [Source Code](#)

January 2025 – April 2025

- Built a real-time Software Defined Radio (SDR) in **C++** and **Python** on a Raspberry Pi to process radio signals at **2.5 million** samples/sec, enabling live audio playback from real radio stations. Utilized Git for version control.

## TECHNICAL SKILLS

**Languages:** C#, Java, Python, SQL, HTML5, CSS, JavaScript, TypeScript, C++

**Developer Tools:** Claude Code, Codex, Amazon Web Services, Postman, Git, Docker, Jira

**Libraries/Frameworks:** ASP.NET, Angular, Spring Boot, NUnit, React, PostgreSQL, NodeJS
